

Cost Effective Management Due Diligence

THE PROBLEM

Occasionally clients approach us for fast, cost-effective assessments tailored to budget, as in the following example. The flexibility of our processes means that we are usually able to accommodate these requests.

RBS were reluctant to conduct a 'full blown' MDD assessment but had reservations that required investigation with regard to the proposed MBO of a leading national logistics company.

THE SOLUTION

We adapted our conventional due diligence assessment techniques to analyse the competencies of the MBO team that was complete, cost-effective and uncompromising.

THE RESULTS

Our findings not only supported the proposed MBO but included proactive recommendations affecting business planning, succession planning and day to day operating.

TESTIMONIAL

Stuart Watson, Director, SDS, commented:

"We needed a cost-effective and responsive way to assess the strengths and potential weaknesses of the MBO team, and Diligencia delivered on both counts."
